But now that these cars are starting to get some age on them, some of their weaknesses are starting to emerge. One of these happens to be the seat tracks. The power seats that came in the 1984-1996 C4 Corvettes were capable of moving the seat in six different directions. However, these new seat tracks used plastic gears, and with age the gears eventually break. This can be very embarrassing or very cumbersome, especially for those who drive with the seat all the way forward or back. Follow along and we will show you how easy it is to fix your broken seat tracks with rebuilt seat tracks from Zip Corvette Parts, 8067 Fast Lane, Mechanicsville, VA 23111, 18009629632. This procedure should only take the average hobbyist 30 minutes per seat. You will need small and medium flatbladed screwdrivers, a 13mm socket, 13mm wrench, and a set of needlenose pliers. 1984-1996 C4 Corvette Seat Track Replacement It is located in the front of the seat frame towards the bottom of the seat. Run your hand down the front of the seat frame to locate it. As a reference, here is a picture after it is removed. Unsnap it from the seat frame, using a small flatbladed screwdriver if needed. Once the clip is removed, push down on the back of the bottom cushion and it will pop out. If your Corvette is not equipped with sport seats, you can skip this step. Then remove the seat from the car. It will have six wires and is located on the floor underneath the seat track. Once they are off, you can remove the seat track and get ready to install the rebuilt track. <http://xn---otbabpoogeff7mf.xn--p1ai/archive/image/delta-31-460-manual.xml>

Please note that you will have to remove the plastic track covers from the front to gain access to the front two nuts. These are held in with plastic push clips, so use a pair of pliers to pull them out and the covers will slide right off. Bolt the track in place and cut the plastic strap around the track.
